# Dog Products for LONG LIFE

KODA from **KEYS**

Why?

When our 14 month old puppy, Jasper, nearly died of a human disease, a Vet saved his life. The medications attacked his young joints leaving him crippled. A human wellness regimen renewed his quality of life and was the inspiration for KODA. It worked!

KODA means "friend" in the Lakota language. It truly means much more. It is a wish for a "Long Life." Long Life is what KODA strives to achieve through natural wellness. Our simple belief is that wellness is the basis of long life and a quality life for both humans and dogs.

Vets are trained doctors looking for solutions to symptoms. They are not trained in wellness. The top 10 reasons for Vet visits can be solved with wellness. Save the money and save the time. Time to Get Wise!

KODA is a combination of ancient remedies, modern technology, the absence of man-made chemicals and a fervent wish for long quality life for all dogs young and old. All through wellness!

JASPER

KODA Snapshot

KODA supplements are vegan, gluten-free and made from human-grade ingredients. They are 100% chemical-free. They are designed to reduce visits to the vet by providing a daily holistic wellness regimen. Supplements are added to food and the topicals are 100% functional. There are <u>no</u> sulfates, glycols, parabens or phosphates. All products are made in the USA.
